

Bandaging Solutions for Dogs and Other Animals

(Socks for dog paws coming soon!)

Bandaging a Canine Elbow Abscess: This is a simple bandage solution and it works great. We alter men's suspenders from Tractor Supply to build a harness that simply goes from the top of one leg to the top of the other. You need both legs in socks to balance this simple harness. The clips are used to hold up the socks. Tubes of micro-fleece are constructed to cover the entire harness to prevent skin abrasions. [Contact us](#) to order. The socks on this dog are the Sport Pony size Silver Whinnys®

Results in 17 days. The veterinarian used Manuka Honey and the Silver Whinnys.
